Work Experience

Software Associate / Sep 2015–Sep 2017

I had worked as Software Associate in project **Tornado** at **Capgemini Technology Services India Limited**, responsible for managing the client **Talk Talk**, which includes different functionalities of **User Acceptance Testing** like test scenario preparation, test execution, defect tracking, performing testing procedures, Selenium Automation and ensuring that all errors are identified and corrected before release to client.

Having excellent problem solving and analytical skills, excellent communications skills and able to liaise with key customer, analyzing business requirements, translating them into concise high-level documents and assuring the quality of deliverables.

Sr. QA Engineer / Sep 2017 – Present

Currently working as Sr. QA Engineer in project **Eldermark Test wizard** at **QSS Technosoft Private Limited**, responsible for managing the client **Eldermark**, which includes different functionalities of **Software Testing** like test scenario preparation, test execution, defect tracking, mobile application testing, functional testing etc. and ensuring that all errors are identified and corrected before release to client. Strictly adhere sprints as per agile and manage github task for peers.
